- During the period from 13 to 15 October, large exercises were held in the area of Zerbst as far as the Aken (M 52/D 96) area. Source was able to determine that the Elbe River formed part of a defense system which was penetrated by the attacking force after use of heavy artillery fire and aircraft. The defending forces slowly withdrew as far as the Zerbst airfield which was planned to be kept as a strong point. Source saw motorized infantry, tanks, armored scout cars, artillery including AT guns and rocket launchers with the practicing troops. All vehicles were parked under camouflage in daytime.
